SnowFlake Ice Shaver

Model VKP1101

Parts Diagram

Your complete Ice Shaver includes everything shown below:

Parts List:

- (1) Lid
- (2) Ice Spikes
- (3) Ice Chamber
- (4) Body
- (5) Ice Molds

Warning

- To prevent personal injury or property damage, read and follow all instructions and warnings.
- Do not use appliance for other than intended use.
- Do not operate if the appliance is not working properly or if it has been damaged in any manner. For service information see warranty page.
- For household use only.

Operating Precautions

- Blade is sharp. Use extreme caution during assembly, while operating, disassembly, and cleaning.
- Do not use if blade is broken, cracked, or loose.
- Close supervision is required when ice shaver is used by or near children.
- Never place fingers or other utensils into the feed or discharge areas.
- Do not store the ice shaver in a refrigerator or freezer.
- Always check ice chamber for presence of foreign objects before using.
- Use only ice cubes made from clean water.

Accessories

Make shaved ice even more fun by using Time For Treats Premium Syrups along with Time For Treats Snow Cone Cups and Spoon Straws. To purchase, visit our website, VKPbrands.com. Syrup flavors include:

Blue Raspberry
Cherry
Grape
Lime

Orange Cream
Piña Colada
Red Raspberry
Root Beer

Tropical Punch
Watermelon

Using Your Ice Shaver

CAUTION: Your Snowflake Hand Crank Ice Shaver has a sharp, stainless steel blade that can cut and cause serious injury. Keep fingers clear from blade and avoid contact at all times when using and cleaning.

Before using for the first time, and following periods of prolonged storage, wash in warm, soapy water, rinse and dry. Do not put in a dishwasher.

Fill ice molds with water and place in the freezer. When frozen solid, loosen ice from ice mold by holding in your hand for a few seconds. Make extra ice blocks and store in an air-tight container in the freezer.

To make fluffy shaved ice style snow, the quality of ice is very important. Ice should be firm and directly from the freezer with no liquid water on it. Wet ice will produce a wet slush output, not snow. For best results keep ice in a freezer until immediately before shaving.

1. Place an ice block (removed from cup) in the machine or ice cubes. Position the empty ice cup or small bowl underneath to catch the shaved ice.
2. Put the lid with handle assembly on the machine, press down and twist lid clockwise until tight. Turn handle clockwise and apply downward pressure to shave ice and produce “snow”.
3. Place “snow” in a paper cone or glass, then add your favorite snow cone syrup or beverage to create your own frosty treat.
4. When ice block or cubes are completely shaved, empty out any remaining ice pieces and add a new ice block or cubes to make more shaved ice.
5. After each use, shake out any water or ice particles remaining in the machine. It is not necessary to wash the machine after using ice made only from water. However, after using flavored ice, wash and dry thoroughly. Do not wash in dishwasher. When assembling, dismantling, or cleaning, always be careful not to touch the blade or ice spikes.

Cool & Easy Treats

Snow Cones

Shave ice directly into Time For Treats Snow Cone Cups. Mound tops with additional “snow” if desired. Dispense your favorite syrup directly on top of the shaved ice. Combine different syrups to create your own unique flavors. Because the shaved ice is so snowy fine, it absorbs the flavored syrup instead of running to the bottom. This give you a truly intense flavor sensation, all the way through!

Slushes

Place shaved ice into serving cups or glasses. Add just enough syrup to totally absorb into the shaved ice. Try one of the following variations for a delicious, cool, and refreshing treat. Garnish with sliced or diced fruit.

Rainbow Slush

A colorful and fun treat. Place a layer of shaved ice in the bottom of a tall, parfait-style glass; add flavoring. Add a middle layer of ice; add a different flavoring. Add a top layer of ice and another flavoring. Garnish with fruit or paper umbrella. A great party treat!

Ice Cream Slush

Place a scoop of vanilla ice cream in the bottom of a glass. Shave ice into glass, covering the ice cream. Add your favorite flavor of Time For Treats Syrup on top for a creamy, refreshing treat.

Soft Drink Slush

Use your favorite variety of soda such as cola, root beer, and fruit flavors. Add a twist of lemon or lime for an added burst of flavor.

Fruit Juice Slush

Natural flavorings are both tasty and good for you. Try apple, grape, orange, grapefruit, or cranberry juices. Or try a combination for a special treat.

Other Shaved Ice Uses

- Shaved ice is a great base when used in other blended drinks and smoothies.
- Combine with fruit, yogurt, or juices for great tasting and healthy treats.
- Fresh shaved ice makes a great ice for fruit trays or seafood appetizers, such a shrimp cocktail.

TROUBLESHOOTING GUIDE

PROBLEM	SOLUTION
Will not shave ice when handle is cranked	Not enough ice in chamber
Ice is too coarse or has large chips in it.	For the finest snow always use the ice molds to make ice blocks. If using regular ice cubes it is normal to get chips or chunks of ice as the cubes can break up when shaving Adjust blade to fine setting.
Shaves ice but it is very slow and /or snow texture is too fine.	Adjust blade to coarse setting. Make sure to press down as handle is cranked.
Handle is very hard to turn	Check to make sure everything is assembled in the correct order: see figure on page 3 This is a hand crank ice shaver and it is normal for it to be hard to crank, especially for small children or people with weak arm strength.

Product Warranty

Register your warranty online at:
VKPbrands.com/Warranty

Model VKP1101 - SnowFlake Ice Shaver Warranty: 2 years

We are confident in the quality of our products and back each one with a limited warranty for the length of time specified above. Should you experience any problems with your product, please contact our Customer Service Department.
