- To prevent personal injury or property damage, read and follow all instructions and warnings.
- Do not use for other than intended use.
- Do not operate if damaged in any manner. For service information see warranty page.
- For household use only.
- Do not place empty Nut Roaster on heated stove top as damage to Nut Roaster or stove top can result.
- Do not leave Nut Roaster unattended while cooking.
- Use caution when cooking and emptying contents of the Nut Roaster as they are very hot.

# Cleaning Instructions

Before using for the first time, wash in warm, soapy water, rinse and dry thoroughly.

After use, allow the Nut Roaster to cool to room temperature before cleaning to avoid damaging it. Add hot water and dish liquid to the nut roaster to soak for several minutes to dissolve the sugar glaze on the pan and the stirring rod. Do not allow the Nut Roaster to soak in a sink filled with hot, soapy water as this may cause damage to the wooden handle.

Do NOT wash in the dishwasher.

## Assembling Your Nut Roaster:

1. Insert handle into pot.
2. Turn handle clockwise until secure. Do not over-tighten.
3. Insert crank assembly into stirring mechanism. Be sure the square parts fit correctly.
4. Insert crank assembly and stirring mechanism into pot and push firmly to secure.

## Using Your Nut Roaster:

**NOTE: The maximum capacity for this Nut Roaster is 3 cups.**

1. Spread your choice of nuts (almonds, peanuts, pecans, walnuts, cashews, or hazelnuts) evenly in the bottom of the pan.
2. Pour glaze evenly over the top of the nuts. Use glaze packaging instructions to determine amount to use.
3. Turn crank handle to mix the nuts and glaze together.
4. Place pan on burner and turn to medium heat.
5. Stir continuously and slowly. This allows the glaze to keep coating the nuts.
6. When the glaze no longer appears liquid, but instead is a crystalline coating, remove the pan from the heat.
7. Using a spatula, immediately spread nuts on a baking tray to cool. If your baking tray is not non-stick, place parchment paper or a silicone baking mat on it to keep the nuts from sticking to it.
8. Separate the nuts with a wooden spoon as needed.
9. **DO NOT** attempt to eat the nuts until they are completely cooled. Sure, they smell amazing, but you will burn your tongue! Seriously, don't do it!
